

Ten Reasons to go for NEWTON

1. **Investment protection.**

Newton is built using OPEN standards technology. Our commitment to the same ensures that you are always ready to integrate other systems with NEWTON. However, Newton offers end-to-end solution for your industry eliminating need of any other system and thus ensuring you high Return on investment all the time at present and in future.

2. **Affordability**

We understand that organization cannot spend exorbitant amount of money implementing ERP systems. Flexible implementation options with Newton and our direct involvement in the implementation make acquisition cost of Newton very affordable for any size of company with any computing requirement. Seamless integration of the business modules allows progressive implementation in a phased manner to form a powerful and comprehensive management information system.

3. **Upgradability**

Newton architecture allows you to upgrade underlying technology and application at your will and at your timelines. For application upgradation, we ensure that the process is easier and faster and does not cause any disruption or stress on your resources and people as most applications do.

4. **Improved employee productivity**

We not just automate your processes. We help you Live your Enterprise Potential. We do this by doing many things like improving the productivity of your people. We provide them information as and when they need it and in way which is easy to understand. This makes your employees do more and contribute more to your organization objectives with what they have and help improve the productivity of your overall organization as well.

5. **Newton Can pay for itself.**

With increasing costs of third party licenses, it helps to have a business solution which can be deployed on linux as well end-to-end. Newton provides you this option. This helps you to reduce your cost of running the IT infrastructure

drastically. In several cases, Newton has paid for itself by the savings clients get by opting for linux as the Operating systems.

6. Our Commitment to Invest in your industry.

We will invest in people and consultants to understand your industry and your needs on continuous basis ensuring higher return on investment. With Newton you have the functionality built just for you and your Industry. Since we own Newton, you are guaranteed of this commitment that you will always have what you will ever need for your industry and as a key customer for us in this vertical.

7. We help you discover what you need to do.

With our strong Business Performance Management and Financial and Budget Systems you can always find out opportunities that can deliver quick wins in terms of improvements whether they are monetary or non-monetary. You will know where your business is in real-time and where you can go.

8. SCALABILITY

Newton is modular. You can implement modules at your timelines. Modules and functionality within the modules can be implemented as and when required since Newton is seamlessly scalable. You may be a single location organization today. Even when you grow to multi-location or multi-products or your people increase manifolds, you are assured that you have a solution that will grow with you.

9. Newton helps you get up and running sooner

With industry specific solutions and tested Fast Step implementation methodology for pre-configured solution, you are assured of fast implementation to get benefits of Newton faster. This ensures lowest total cost of ownership. And it does not put stress on your resources and people during implementation. The result is an affordable solution that is up and running in days and weeks rather than months and years. **With Faster ROI**, Newton is probably going to be the best investment you would have ever done.

10. Support that's tailored to your needs
