Harish Kumar Saraf | CEO | Nippon Data Systems Ltd.

When a company is looking for ERP, that means it is growing at tremendous rate and it expects that the organization which is providing ERP, to automate all back office functions, must work so efficiently that the company's focus from its own business should not fluctuate. There are many ERP providers who claim to provide an effective system but fail to prove it. **Nippon Data Systems Ltd. (NIPPON DATA)** is among the very few who emerged as a responsible service provider.

Established in 1994, Nippon Data Systems Ltd. was formed with an objective of providing software development and related services. They develop, implement and support Enterprise Resource Planning Software for customers around the world including some of the most successful companies.

A Team Improving Efficiency in all Aspects

Harish Kumar Saraf, the Founder of Nippon Dada System Ltd. is a Gold medalist in B.Tech, Computer Science, after which he started working with TATA UNISYS LTD. He then did consulting for some leading clients in the USA. He returned back from the USA to India to establish Nippon Data Systems where he built NEWTON ERP with his team and took it to the market achieving a great success.

Struggling through initial period, perseverance, hard work, self-belief and honesty within the team-mates helped them to build the company. Their commitment to the customers is unconditional. They believe that their success is because of their customers.

NIPPON DATA is constantly making efforts to improve efficiency in all aspects of their relationship with customers. Their core values are honesty, integrity, trust and responsibility. They help their clients to achieve their management objectives through NEWTON implementation which reduces cost, improves productivity and manage growth and thus becomes more competitive.

Integrating Every Single Part of Your Business

NEWTON ERP (Enterprise Resource Planning), NEWTON CRM (Customer Relationship Management), NEWTON SCM (Supply Chain Management), NEWTON BPM (Business Process Management), NEWTON POS (Point of Sale), NEWTON HCM (Human Capital Management), NEWTON EAM (Enterprise Asset Management), NEWTON PM (Project Management) and NEWTON CM (Case/Compliance Management) are the solutions they provide which, backed with their unmatched Professional Services, covers all the areas of management.

NEWTON ERP Software, the flagship product from Nippon Data, can manage information management needs of enterprises operating in diverse business segments ranging from single-location, single-product operations to multi-location, multi-product, multi-factory, multi-division operations. Newton is able to integrate every single part of your business under one roof, so that sales and distribution, customer service, manufacturing and finance all work in unison.

Integration of data across different functions and stakeholders provides businesses capability to "DO MORE WITH WHAT YOU HAVE". Insight into functional areas whether it is sales or inventory, finance or others, makes it easy to identify opportunities for cost saving and efficiency improvements. A high-level view of key business indicators facilitates faster and more accurate management decisions and a "NEWTON" interface puts all of this at your fingertips.

Growing Along with their Clients

NIPPON DATA is expanding its business in the Emerging markets and are committed to drive its business with focus on customer success rather than just numbers in the license sales. This is where NIPPON DATA differ from others; they are growing with their client's business. They are investing in the Industry specific business functionality and are working closely with their clients to continuously innovate and provide unmatched solutions.

The company provides Industry Specific Solutions resulting into faster implementation without putting burden on financial and other resources of the organization. They claim themselves to be a partner in growth and not just a service provider. A high standard of Integrity is followed by Nippon Data in all its dealings with internal and external stake-holders. They deliver Senior Leadership involvement in client engagements. Cost effective solutions which are affordable and committed to high ROI is their key role in the market.

NIPPON DATA knows that you are working for growing and being efficient, and gaining a competitive edge in the market and hence, they make sure to get you there in an affordable way. NIPPON DATA is an economical, integrated Business Management solution that offers the comprehensive assortment of capabilities needed to run the business in most effective fashion.

Striving to Become the Top Preferred Solution Provider

NIPPON DATA is creating an environment which encourages innovation and enables all stakeholders to gain. They have achieved leadership position in several verticals in different markets and continue to focus on their GOAL to be among the Top 3 preferred solution providers in all the markets they operate in.

NIPPON DATA invest in people and resources to understand "Client's Industry and Client's needs" on a continuous basis, ensuring a higher return on investment for its clients. With NEWTON, clients have the functionality built just for them and their Industry.

NIPPON DATA strives to provide an environment that is stimulating with high levels of motivation, empowerment and recognition, removing obstacles that hinder creativity. In this energized atmosphere they share successes while setting new standards of excellence.
