One-stop shop for all IT requirements

In the digital realm, keeping a competitive edge means being able to anticipate and respond quickly to changing business conditions. Nippon Data Systems Limited is the 'NEWTON family' that provides IT-enabled business solutions. Their goal is to provide a competitive advantage to their clients and allow them to 'Live Your Enterprise Potential'.

Ever since Nippon Data System was established in 1994, it has worked to build a foundation which has helped them grow into one of the leaders of their segment. They are positioned in Noida, U.P. in conjunction with an office in Mumbai and soon going to begin operations in Thailand & Singapore. With employee strength of around 400, they have been a diverse set of businesses for the last 24 years. Nippon Data professionals have encountered and conquered complex problems. They specialize in solving all sorts of business needs by harnessing technology. They enable this for their client partners by developing customized and standard information systems for them. For Nippon, client satisfaction is the ONLY measure of success.

Their portfolio of offerings includes solutions for ERP, CRM, SCM, BPM, PLM, Human Capital & Financial Management, Enterprise Performance and Asset Management,

Infrastructure, Cloud Computing and BI services. Nippon's ERP software-Newton ERP, stands as the company's flagship product that caters to the information management needs of enterprises operating in diverse business segments and integrates every part of the business under one roof. The extensive expertise Nippon has achieved through delivering ERP software has helped the company gain an in-depth understanding of its customer's expectations allowing them to succeed in the CRM market as well.

Nippon's entrepreneurial leaders

Harish Kumar Saraf, CEO & Founder of Nippon Data, has Bachelors of Technology in computer science and is a gold medal holder for his efficiency in his academia. He came back to India from the United States to establish Nippon Data Systems where he set

up NEWTON ERP with his team and later built other business applications with a unique approach.

Ashish Kumar Saraf, Director of Nippon Data, has over 15 years of experience in consulting. He has done his MBA in Finance and has been a part of leading clients implementation. Together they envisioned the corporation as a high-tech performer. They have the vision to make Nippon the leading solutions provider. They have implemented an energetic and innovative approach in conducting their business

organizations including but not limited to SMEs, SMBs and enterprises. Nippon's leaders understand that 'One size does not fit all'.

Strategic approaches that echo Success

Nippon Data has invested several thousands of man-years of effort in bringing 'NEWTON ENTERPRISE SUITE' set of business solutions to life. This industry-specific 'NEWTON SOLUTIONS' help clients afford Enterprise Resource Planning that can be implemented faster than any other solution and facilitates the lowest cost of Total Ownership. Nippon Data uses Oracle's technologies as a database system.

It uses the widely used Microsoft's .NET as its application framework. It is noteworthy that all Newton Flagship Products (Newton ERP and Newton CRM) are available as web applications. This means Nippon Data customers can access their systems anywhere and at all time. Nippon's solutions use AGILE as their development model of choice. This means iteration is rapid and their solutions can be very quickly adjusted to suit their customer's needs. They use a system of continuous feedback multiple gathered from a diverse set of industry domains and

Welcome to Nippon's luxurious exclusive suite

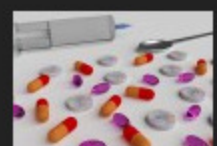

NEWTON SOLUTIONS offered by Nippon Data Systems consist of:

Newton ERP: Newton ERP software solution help enterprises to see more. The integration of data across different Business Intelligence platforms in an enterprise allows customers to have great visibility in all regions of their business, from daily operations to a strategic decision level making. Their web-based approach allows for easy deployability across a wide range of platforms.

Newton CRM: Automation is the future. Businesses who automate will be the ones who remain competitive.

Our CRM product, therefore, has an in-built intelligence and has been largely accepted in the CRM space with many references of high customer satisfaction
